OUR MISSION

WELCOME TO FRENCHIE NETWORK

At Frenchie Network our goal and top priority is to create a viable, fast & zero fees blockchain network that can compete head-to-head with DOGE blockchain, yet smarter and faster with an extremely low inflation that can sustain an real-world economy.

Our secondary goal and priority is to create a friendly community on which we could make a change in the world, by creating a “#FrenchieSavesTheWorld” funds and movement on which our community can support our current world fragile environment. Since #COVID-19 a lot of people are out in the streets and without jobs. We will do “live” events in which we will buy groceries and supplies across the world for families and kids in need, for orphanages and street-people. Why? Why not going for the animal kingdom? Its simple as “If we cannot take care of our own human race, how can we solve the other world problems?” .

So we take it in our sight to solve the friction of fees and the bad user experience of all cryptocurrencies that are on-market and to empower people back in order to create a positive loop feedback in the world with the power of Frenchie Network & Token.

Our third goal and yet one of the utmost priority from which the first two will not be possible is our Community Culture. We believe that without a strong community that has the traits of our beloved French Bulldogs it would be impossible to succeed in such crypto competitive environment.

- Intelligent - Exactly like a ‘Frenchie’ we don’t listed to fear, uncertainty and doubt or watch charts 24/7. But we find ways to work smart, research innovative technologies and implement them in our token and network.

- Friendly - A French Bulldog is very friendly, kind and playful. We do not turn people away based on how much FREN they hold, nor for race, color, creed, gender, sexual preference, or any other factor. We are all a Frenchie Family #FrenFamily, together.

- Huge Pain Resilience - Here at Frenchie we believe that HARD WORK pays off. We won’t give up at any roadblock, stone or fear, uncertainty and doubt moments. We push even if it hurts!

VISION & TOKENOMICS

ABOUT THE PROBLEM

There are numerous roadblocks that prevent people and organizations from enacting meaningful change in people lives and also in our current financial systems that rewards the rich and punishes more the poor. In cryptocurrency we can take care of both. Thats why we haven't started with a pre-sale and is also the reason why the majority of the Marketing Funds will go to Airdrops, Giveaways , Contests, Liquidity Bootstrapping Pools. It give us enough room and liquidity redistribute the token fairly even too those who cannot afford to BUY it.

With these concepts in mind, FREN has been created with a progressive, burn mechanism to form a bond between our product and our goals while ensuring investors are not hampered by inflation or changing market conditions But in the same time to be in-sync with all holders. On which we will burn 50 BILLION FREN each time we reach 500 holders up to 2500 holders. Creating a deflation that will be direct linked with the number of FREN owners and keeping our vision to empower people from the poor one to the rich one. Making it fair for all investors no matter the amount of FREN they have.

After the first 60 days, we will assess the FREN mechanics and determine if further burn is required. If its required we will take 3% + 2% out of Development & Marketing Funds in order to rebalance. .

These principles accomplish a number of key goals:

- Reduces day-to-day volatility of the FREN Token value
- Creates financial conditions for exponential growth over time
- Constant and organic growth based on actual FREN believers & investors.

Tokenomics Breakdown

Initial Supply 1,000,000,000,000	Initial Liquidity 250,000,000,000	Marketing 300,000,000,000	Development 200,000,000,000
Initial Liquidity Lock 12 Months	Burning Process 50,000,000,000 per 500 holders up to 2500 holders.	Vested Funds 347,700,000,000 between 5-10 months part of Development & Marketing on DXLocker	

WHY BLOCKCHAIN NETWORK ?

We've seen the value behind DOGE inflation, accessibility, and fun-to-use feeling of it. But we saw the lack of adaptability to constant demand of a fun and easy to use cryptocurrency but with a good User Experience. A true competitor for DOGE place, a token that will go head-to-head for usability as blockchain technology for payment systems across the world to offer cheap and fast transactions and to have access to smart contracts and IoT access at extremely low cost similar to what a network like DOGE + the power of an infrastructure similar to Tron or BSC would look like. On top of that we need to quit the old absolute Proof-of-Work cryptography and start to move more into Proof-of-Stake systems or even more ecological with zero carbon emissions and silicon usage.

IS THERE A PLAN B?

The plan is in the end to remain a community driven token, in which we renounce ownership and let it live by itself similar to DOGE. Open-source and free to act-upon it by nodes / self-governance. As if we fail somehow to reach the growth target that will allow us a full-fledged development, we will deploy FrenchieDAO, self-governance contract in a swap upgrade and let community control its funds, burn rate and vault wallets with remaining funds or future donations for development and marketing. A much more flexible and self-governed token and multi-bridged between BSC and other networks that allow such.

MARKETING PLANS

We are in talks with PR companies and we already paid and closed a good package for frenchie community composed out of marketwatch, hackernoon, cryptopotato and newsbtc.

We've reached Youtubers and influencers, organized our first 'twitter meme contest'. And more we are preparing a tik-tok challenges, guerilla airdrops, surprise airdrops on those who got scammed in a so called 'rug pull' movement.

Those people had their own families to provide for. We will try to give them an early airdrop and a chance to restore

USE CASE SUMMARY

We're an community-based token on the Binance Smart Chain that rewards its holders and users by being transparent team with vested and locked funds, by burning 25% of its supply and even more if necessary after 60 days since token launch, distributing over 30% of its supply to talented developers, artists, other communities and create an even and fair financial environment.

FURTHER PRODUCTS AND TECHNOLOGY USE

Between our merch, airdrops, burn events, giveaways, and the FrenDAO, we are hoping to bring a thriving, fun, and rewarding ecosystem to the Binance Smart Chain and to the world. However, Frenchie Developers is not something that stops at these core visions. We will continue to innovate and find ways to use our financial and technological capabilities to bring further innovation in the cryptocurrency community!

FRENCHIE ECOSYSTEM

MORE THEN JUST A 'MEME'

Obviously, a token that serves no purpose but to raise funds will not sustain market value over time no matter how good the tokenomics. That is why Frenchie is hard at work to develop a comprehensive, forward-thinking roadmap for crypto use in Self-Governance, Eco-friendly blockchain technologies, and Financial Inequality.

This roadmap includes the following key components:

MERCHENDISE

Frenchie Network is working with AAA Graphic Designers, Game Artists, and 3D designers to bring amazing, cute, and fun merchandise to the market. This merchandise will formed out of Non-Fungible Tokens (NFT's) and physical items like stickers, t-shirts, hats, baseball caps and more!

With a network of fiat merchant official stores & NFT Markets what we aim to use the 50% OF THE FIRST YEAR PROFITS added as Liquidity together with required of % Marketing Funds in BUSD(stable coin) and burned forever. In case profits are bigger then all remaning % Marketing funds by the end of that will be used to buy FREN and BURN them.

FrenDAO

The hallmark of a decentralized organization is that even its ongoing decisions are decentralized. To that end, Frenchie developers seeks to develop FrenDAO, a Decentralized Autonomous Organization. This set of contracts and dApps will allow us to divest completely from the Frenchie token contract, and utilize voting by stake to make decisions regarding the Frenchie community. These decisions can include any changeable parameters of the Frenchie token Contract, and will ensure a strong decentralized practice based on holder commitment to the platform.

THE TEAM

SPIRY CAPITAL

The journey started at the age of 14, he started seeking knowledge in cyber-security domain and became master as at the age of 15 years he was already part of Romanian Security Team (R.S.T) as one of the leaders given the role of 'Super-Moderator', giving him the responsibilities to mentor any new user that was eager to learn about cyber-security and excelling at it

In 2014-2015 he founded crypto news platform 247cryptonews.com and Spiry Capital (spiry.ro). 247CryptoNews being a project that has opened him to multiple new opportunities in cryptocurrency world.

Spiry Capital as today remaning his 'brand' umbrella to which his investment and projects to be known In same moment he has been involved directly into the Development Teams of crypto projects & blockchain developments like Expanse, TeslaCoin, FrankoCoin, MagicInternetMoney and more. All part of his journey to better understand the underlying mechanics, technicalities, security and fundamentals of blockchain technology.

Now we are a big team formed out of 4 developers aiming to solve issues around the globe by the power of Decentralized Finance and pure code!
