OUR MISSION

WELCOME TO FRENCHIE NETWORK

Deployed on Binance Smart Chain, we aim to cement the Frenchie Network ecosystem as the first and most revolutionary project to bring-in a real public smart chain that is faster, eco-friendly and cheap than any other possible competition out there.

Our primary goal is to make Frenchie Network a high-performance, scalable, and secure smart-contract platform. Designed to overcome the limitations of previous generation blockchain platforms.

A blockchain network that can compete head-to-head with DOGE blockchain, yet smarter and faster with an extremely low inflation that can sustain a real-world economy.

Frenchie Network will be permission-less, decentralized, and open-source.

Consensus mechanism used by Frenchie Network, aBFT its revolutionary between smart-contract platforms similar to Binance Smart Chain, Ethereum and others alike, it allows Frenchie Network to be much faster and cheaper than older technologies, yet extremely secure.

Our secondary goals and priority are to create a friendly community on which we could make a real change in the world, creating a “#FrenchieSavesTheWorld” fund in the near future, by supporting our community members in need, by helping other communities that have been scammed in their investments our community will participate actively to support the current world fragile environment. Since #COVID19 a lot of people are out in the streets and without jobs. We will do “live events” in which we will buy groceries and supplies across the world for families and kids in need, for orphanages, and street-people. We believe this goal can be achieved with a strong community, part of our secondary goal which the first two from above will not be possible without our Community Culture. Without a strong community that has the traits of our beloved French Bulldogs it would be impossible to succeed in such crypto competitive environment.

VISION & TOKENOMICS

ABOUT THE PROBLEM

There are numerous roadblocks that prevent people and organizations from enacting meaningful change in people lives and also in our current financial systems that rewards the rich and punishes the poor.

In cryptocurrency we can take care of both. That's why we did not start with a pre-sale and is also the reason why the majority of the Marketing Funds will go to Airdrops, Giveaways, Contests, Liquidity Bootstrapping Pools. It gives us enough room and liquidity to redistribute the token fairly even to those who cannot afford to BUY it.

With these concepts in mind, FREN has been created with a progressive, burn mechanism to form a bond between our product and our goals. This ensures investors are not hampered by inflation or changing market conditions. But in the same time are in-sync with all holders. On which we will burn 25 BILLION FREN each time we reach 250 holders up to 2500 holders. Creating a deflation that will be directly linked with the number of FREN owners and keeping our vision to empower people from the poor one to the rich one. Making it fair for all investors no matter the amount of FREN they have.

After the first 60 days, we will assess the FREN mechanics and determine if further burn is required. If it is required we will take 3% + 2% out of Development & Marketing Funds in order to rebalance.

These principles accomplish a number of key goals:

- Reduces day-to-day volatility of the FREN Token value
- Creates financial conditions for exponential growth over time
- Constant and organic growth based on actual FREN believers & investors.

Tokenomics Breakdown			
Initial Supply	Initial Liquidity	Marketing	Development
1,000,000,000,000	250,000,000,000	300,000,000,000	200,000,000,000
Initial Liquidity Lock 12 Months	Total Supply 750,000,000,000 Burned Supply 250,000,000,000		Vested Funds 347,700,000,000 between 5-10 months part of Development & Marketing

WHY BLOCKCHAIN NETWORK ?

We've seen the value behind DOGE inflation, accessibility, and fun-to-use feeling of it. But we saw the lack of adaptability to constant demand of a fun and easy to use cryptocurrency but with a good User Experience. A true competitor for DOGE place, a token that will go head-to-head for usability as blockchain technology for payment systems across the world to offer cheap and fast transactions and to have access to smart contracts and IoT access at extremely low cost similar to what a network like DOGE + the power of an infrastructure similar to Tron or BSC would look like. On top of that we need to quit the old obsolete Proof-of-Work cryptography and start to move more into Proof-of-Stake systems or even more ecological with zero carbon emissions and silicon usage.

IS THERE A PLAN B?

The plan is in the end to remain a community driven token, in which we renounce ownership and let it live by itself similar to DOGE. Open-source and free to act-upon it by nodes / self-governance. As if we fail somehow to reach the growth target that will allow us a full-fledged development, we will deploy FrenchieDAO, self-governance contract in a swap upgrade and let community control its funds, burn rate and vault wallets with remaining funds or future donations for development and marketing. A much more flexible and self-governed token and multi-bridged between BSC and other networks that allow such.

MARKETING PLANS

We are in talks with PR Companies and we already paid and closed a good package for frenchie community composed out of marketwatch, hackernoon, cryptopotato and newsbtc.

We've reached Youtubers and influencers, organized our first 'twitter meme contest'. And more we are preparing a tik-tok challenges, guerilla airdrops, surprise airdrops on those who got scammed in a so called 'rug pull' movement.

Those people had their own families to provide for. We will try to give them an early airdrop and a chance to restore their financial health as well as their mental one. And issue

USE CASE SUMMARY

We're an community-based token on the Binance Smart Chain that rewards its holders and users by being transparent team with vested and locked funds, by burning 25% of its supply and even more if necessary after 60 days since token launch, distributing over 30% of its supply to talented developers, artists, other communities and create an even and fair financial environment.

FURTHER PRODUCTS AND TECHNOLOGY USE

Between our merch, airdrops, burn events, giveaways, and the FrenDAO, we are hoping to bring a thriving, fun, and rewarding ecosystem to the Binance Smart Chain and to the world. However, Frenchie Developers is not something that stops at these core visions. We will continue to innovate and find ways to use our financial and technological capabilities to bring

FRENCHIE ECOSYSTEM

MORE THEN JUST A 'MEME'

Obviously, a token that serves no purpose but to raise funds will not sustain market value over time no matter how good the tokenomics. That is why Frenchie is hard at work to develop a comprehensive, forward-thinking roadmap for crypto use in Self-Governance, Eco-friendly blockchain technologies, and Financial Inequality.

This roadmap includes the following key components:

MERCHENDISE

Frenchie Network is working with AAA Graphic Designers, Game Artists, and 3D designers to bring amazing, cute, and fun merchandise to the market. This merchandise will formed out of Non-Fungible Tokens (NFT's) and physical items like stickers, t-shirts, hats, baseball caps and more!

With a network of fiat merchant official stores & NFT Markets what we aim to use the 50% OF THE FIRST YEAR PROFITS added as Liquidity togheter with required of % Marketing Funds in BUSD(stable coin) and burned forever. In case profits are bigger then all remaning % Marketing funds by the end of that will be used to buy FREN and BURN them.

Frenchie Network

The hallmark isto cement the Frenchie Network ecosystem as the first and most revolutionary project to bring-in a real public smart chain that is faster, eco-friendly and cheap then any other possible competition out there.

THE TEAM

SPIRY CAPITAL

The journey started at the age of 14, he started seeking knowledge in cyber-security domain and became a master. At the age of 15 years he was already part of Romanian Security Team (R.S.T) as one of the leaders given the responsibilities to mentor any new user that was eager to learn about cyber-security and excelling at it

In 2014-2015 he founded crypto news platform 247cryptonews.com and Spiry Capital (spiry.ro). 247CryptoNews being a project that has opened him to multiple new opportunities in cryptocurrency world.

Spiry Capital as today remaning his 'brand' umbrella to which his investment and projects to be known In same moment he has been involved directly into the Development Teams of crypto projects & blockchain developments like Expanse, TeslaCoin, FrankoCoin, MagicInternetMoney and more. All part of his journey to better understand the underlying mechanics, technicalities, security and fundamentals of blockchain technology.

Now we are a big team formed out of 4 developers aiming to solve issues around the globe by the power of Decentralized Finance and pure code!
